Excellence, innovation and collaboration

At Burnet, we are helping to create the future of health.

The Burnet 2030 Strategy focuses on growing our impact, placing equity at the centre of what we do, and paying close attention to the effects of a rapidly changing climate and environment.

Our point of difference is our technical breadth—from laboratory-based discoveries to field research, to commercialisation to development programs; all to progress toward a more equitable world.

This is what sets us apart.

The future of health is

Diseases eliminated

Healthy mothers, children and adolescents

A more prepared world

Harm reduction

For all people

“

At Burnet, we are actively working towards a healthier world, one where all people, no matter their status, location or background, have access to life-changing research and health programs.

Professor Brendan Crabb AC
Director and CEO, Burnet Institute

Respect, Equality,
Inclusiveness, Diversity

----- Our Vision

**A more equitable
world through
better health.**

----- Our Purpose

**Create and translate
knowledge into better
health, so no-one is
left behind.**

Our priorities for future impact

1

Research Programs

- Strengthened and better resourced **interdisciplinary programs**; technically diverse experts working together to solve global health problems.
- A sharper focus on three core programs; **Disease Elimination, Health Security and Pandemic Preparedness, and Maternal, Child and Adolescent Health.**
- Increased investment in our three **flagship initiatives** (Eliminate Hepatitis C Australia, Healthy Mothers, Healthy Babies, and Know-C19), and developing the Burnet Diagnostic Initiative (BDI), and Indigenous Health Research Capacity Building Initiative.

2

Environment

- Creating an environment with the **resources, capability, and conviction** to undertake and support world class research and programs.
- Strengthen operations in three priority countries; **Australia, Myanmar and Papua New Guinea.**
- The new **Strategy Insights and Impact Office** provides an enhanced focus on strategy implementation, alignment, and performance measurement and reporting.
- A Foundation Partner in the groundbreaking **Australian Institute for Infectious Disease (AIID)**, a purpose-built facility and Burnet's new home will strengthen our ability to deliver.

3

People

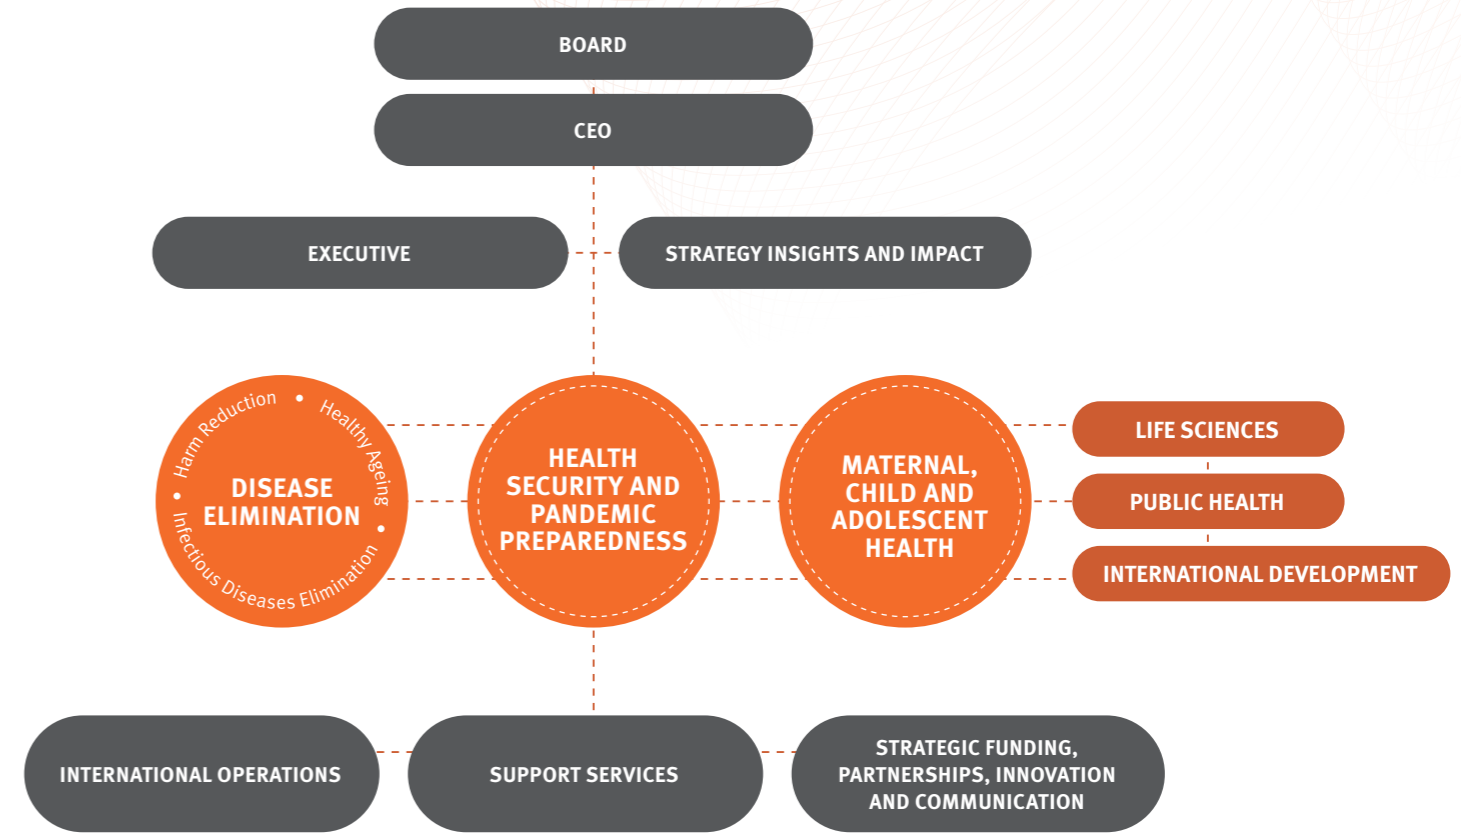

- Being the aspirational workplace within the sector with ethical values and a culture committed to fostering talent for **future leadership and rewarding careers.**
- Investing in **job security, gender equity, our Reconciliation Action Plan,** and creating opportunities for **emerging scientists.**
- Building a culture based on our key values of **Respect, Equality, Inclusiveness and Diversity.**

Australian Institute for Infectious Disease

The Australian Institute for Infectious Disease (AIID) aims to protect Australia and the wider Asia-Pacific region against major global health issues and pandemics. Its formation maximises the strength of partners and provides enhanced capabilities across research and its translation, public health, and education. The AIID is a collaborative initiative of foundation partners **Burnet Institute, the Doherty Institute** and **The University of Melbourne**, with funding from the Victorian Government.

Burnet 2030 places interdisciplinary thematic health programs at the heart of our daily decision-making. Our refined program structure builds on our technical breadth to maximise our impact.
