

RESEARCH TRANSLATED INTO PRACTICE

A sustainable model for diagnostic
development and translation

BDi Burnet
Diagnostics
Initiative

A Burnet Institute initiative

Certification Number: FS 768091

“The BDI implemented systems and processes that enhance the translation of new technologies into practical health solutions so that our products can reach populations most in need.”

Jennifer Barnes
Director, Burnet Diagnostics Initiative

WHY CHOOSE BDI?

Producing commercially viable products for unmet health needs.

The Burnet Diagnostics Initiative’s unique approach aims to close the gap on health inequity with practical health solutions.

Experienced multi-disciplinary team with a track record for translational impact.

Diverse leadership team with over 15 years’ experience developing diagnostic tests, vaccines, and medical devices focusing on infectious diseases and women’s health.

Backed by Burnet Institute’s resourcing for an end-to-end solution.

Burnet is committed to developing systems, resources and processes, utilising existing health clinicians and public health network to support diagnostics product development and enhance translation into practical health solutions — in the hands of those that need them most.

ISO QUALITY MANAGEMENT SYSTEM

We pride ourselves on our Quality Management System, uniquely placing equal importance on innovation, and translation using industry aligned practices. Our team is encouraged to explore new ideas in a controlled environment for evidence-based decision making and reproducibility, even at discovery research stage. The BDI’s first certification, ISO 9001, is expected in 2023.

SUSTAINABLE SOLUTIONS FOR COMMERCIAL SUCCESS

The BDI is setting up a sustainable model for diagnostic development, focusing on building skills, capacity, systems and processes to ensure discovery R&D can be rapidly translated into practical products that meet a defined market need.

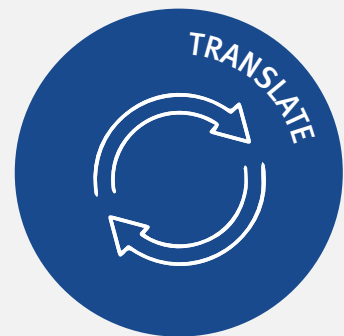

WHAT WE DO

Biomarker Discovery
Protein Design and Production
Virology
Immunology
Diagnostics Development

Analytical Studies
Clinical Studies
User Acceptability Studies

Prototype Development
Market Development
Technology Transfer
Licensing

WORK WITH US

Co-Development | Fee For Service | Contract Research Programs

Join the Burnet Diagnostics Initiative in making a positive impact on the healthcare industry by developing practical and affordable diagnostic tests to fill unmet needs.

Interested in working with the BDI?

Contact Jennifer Barnes, Director, Burnet Diagnostics Initiative, at bdi@burnet.edu.au for a tailored and confidential discussion and discover how partnering with BDI can help achieve your goals.

The Burnet Diagnostics Initiative (BDI) is a commitment by Burnet Institute to develop the systems, resources, and processes to support diagnostics product development and enhance translation of its point-of-care diagnostics research into practical health solutions.

Burnet Institute is an Australian-based medical research and public health institute and international non-government organisation that is working towards a more equitable world through better health.
